Congratulations on your purchase of the Fulltone®

'70-BC®

This new version of the Classic Fulltone '70 pedal is equipped with the elusive BC-108C silicon Transistor, my personal favorite transistor used in the circa-1970-1973 Fuzzface pedals.
One of the desirable traits of these NPN Transistors (when matched properly) is their Tube-like responsiveness and thick, even harmonics....the other being they clean up incredibly when turning down the guitar's volume knob!

Your 70-BC has a Mid knob that greatly varies the mid frequencies, adds Gain, and allows you to fine-tune to your guitar/amp configuration and cut through in a live band situation, something the original Fuzzface cannot do. You'll find a "sweet-spot" where the notes want to sustain.. stock Fuzzface sounds are located with this "Mid" knob Fully counter-clockwise.

There's an internal trimmer (set by us) that affects the pedal's response and varies the feel from soft to firm...feel free to experiment!!!!!!!!
Turn Clockwise to soften and compress more
Turn CCW to increase loudness, quicken tracking, and increase bottom end.

This pedal is fitted with a DC jack (2.1mm shaft) for use with a power supply (not included, but we recommend our FPS-1) Always use a "regulated" power supply with Negative (-) to center pin…you may use any voltage from 5 to 18 volts, although 9 volts DC is the standard.

Note: there may be some crackling noises while turning the "Mid" and "Gain" Pots...this is normal so don't worry.

All Fulltone products carry a 5 year warranty to the original owner with proof of purchase. The Warranty covers damage by our errors only, and not any mod or repair done by anyone other than Fulltone without prior written consent! Footswitches are warranted for 1 year, and batteries are not covered. Customer pays shipping in advance, and all warranty work must be preceded by a phone call for scheduling. Fulltone Musical Products Inc. is not responsible for injuries incurred while using our products nor any damage to other items related or non related to the use our products.
